

STOPZILLA MOBILE SECURITY

The Ultimate Protection Against Mobile Malware and Viruses

KEY BENEFITS

AntiVirus and AntiMalware Protection

STOPzilla Mobile Security for Android provides a reliable and smart AntiVirus/AntiMalware solution by using “In-The-Cloud” scanning. With this technology, STOPzilla Mobile Security offers a safe Internet browsing experience and stops malicious and fraudulent applications from being installed.

Low Battery Impact

STOPzilla Mobile Security offers you full protection for your Android mobile device while only minimally affecting battery life, giving you one less thing to worry about.

Anti-Theft System

STOPzilla Mobile Security provides you with a personal web-based security portal, giving you the options to remotely track, locate, lock, message, or erase your Android smartphone or tablet. This ensures that your data remains secure and uncompromised.

Supported in the USA

STOPzilla Mobile Security is 100% supported by our employees in the USA who take personal pride in ensuring you receive a top-quality product, with the best customer and technical service possible.

STOPZILLA MOBILE SECURITY KEY FEATURES

Anti-Theft

Offers the ability to locate, lock, wipe, or message your Android device remotely.

Immediate Install Scanning

STOPzilla Mobile Security automatically scans any application immediately after it is installed.

Web Security

With our “In-The-Cloud” scanning technology, STOPzilla Mobile Security provides precautionary measures against compromising websites.

On-Demand Scanning

STOPzilla Mobile Security can also run “On-Demand” scans at any time to ensure that all the applications installed on your Android device are valid and safe.

Privacy Advisor

STOPzilla Mobile Security can keep track of each application’s permission requirements, showing how your installed apps are using your sensitive data.

App Lock

App Lock allows you to use a PIN code to lock and protect your private apps so you can browse and socialize online worry free.

Supported Operating Systems

- Android 3.0 or later
